A B S T R A C T

Here is disclosed a wearing article made of an elastically stretchable chassis defining a front waist region, a rear waist
5 region and a crotch region. This sheet is composed of a first elastic segment extending, substantially in parallel to peripheral portions destined to form leg-holes, from a transversely middle zone of the crotch region to lateral portions of the front and rear waist regions, and a second
10 elastic segment defined by the remaining portion except for the first elastic segment wherein the first elastic segment has a stretch stress higher than that of the second elastic segment.
